

# cabanga

**Cabanga™**  
Zulu for *imagine*  
Online interactive math program

Cabanga™ puts the fun back in math! In a celebrity agent role-playing game, kids learn to apply math concepts and methods for business success.

While instilling confidence and developing competence in the math concepts that kids commonly struggle with, Cabanga™ satisfies kids' craving for cool.

# CABANGA™

## Cabanga™ matters

- Makes math relevant through real-life financial simulation and application
- Builds math competence through game play as well as work on numeric, algebraic, and word problems in critical topics
- Offers threat-free instruction
- Supports learning through written and graphic feedback
- Enhances confidence and ability to make smart decisions in ambiguous situations
- Supports cognitive and emotional development
- Develops 21st century skills like problem solving, innovation, and collaboration
- Develops independent learning and technology skills

## Cabanga™ works

- Motivates through game-play format
- Fun, engaging, and easy-to-use
- Differentiated instruction through adaptive curriculum within 30,000 leveled questions over 11 topics in which kids commonly struggle
- Supports competition with optional leader board
- Includes instructional coaching, formative, and summative assessment
- All content is correlated to NCTM, State, and Common Core standards
- Robust Teacher Dashboard supports game customization, student performance tracking, and progress against standards
- Parent connection
- Online and accessible 24/7
- Spanish toggle for ELL

## Why you know Six Red Marbles...

Six Red Marbles is an award-winning provider of educational solutions for the PK–12 market. For decades, we've helped leading publishers like McGraw-Hill, Houghton Mifflin Harcourt, and Pearson develop and produce creative, effective, interactive, educational programs for students and teachers. But we've decided we can do more. So in 2009, we committed to use all our experience to develop our own learning programs with the goal of engaging kids, taking the fear out of learning and helping them get the most out of their education. As a result, The Natural Learning Approach we've developed blends the latest neuroscientific research with a thing we like to call Tribal Pedagogy. We add a dash of creativity, serve it up with the ease of interactive, online delivery and are now pleased to introduce fun learning environments that inspire kids and put them on personal paths to success.
